COMSTOR Outdoor Goes Green: Introducing New Environmental Friendly Billboards

Huntsville, Ohio – COMSTOR Outdoor, Ltd. introduces a new line of environmentally friendly products; which will give its customers an opportunity to both promote their business and give-back to the environment at the same time.

COMSTOR Outdoor customers will have the opportunity to request the Eco-Flexx™ environmentally friendly product option. Eco-Flexx™ is a 100% recyclable polyethylene (PE) substrate for billboards. It is both durable and non-toxic and generates a deep, saturated color that will please even the most demanding of advertisers. It is important to reduce and eliminate the use of PVC materials where practical alternatives exist.

Many leading corporations and companies (Nike, BMW, Daimler-Benz, Honda, Apple, Dell, Samsung Sony, Wal-Mart, etc) have taken the initiative to institute such environmentally responsible alternatives into their advertising campaigns and COMSTOR Outdoor will pledge to do the same for its products and services.

To learn more about COMSTOR Outdoor, Ltd., and explore our environmentally friendly billboard options, please contact the office at 888-354-2591.
